MEMORANDUM FOR: See Distribution

FROM:

25X1

SUBJECT: Medicare Reporting

1. Planning for the way that we will handle Medicare tax and credit for Agency employees has stalled. There are some difficult decisions to be made and much of what we will propose to do is subject to the approval and cooperation of the Social Security Administration (SSA.) With eight months remaining before the first report of credits is due, time is short to make those decisions, coordinate them with SSA and develop the computer capability to carry out the program.

2. I propose that we meet at the earliest opportunity to discuss the concerns of each addressee office. In preparation for such a meeting, I have attempted to review the needs of the Agency, as represented by each office. Attached is a description of the major facets of the problem and an outline of the various interests that must be given their due. As you formulate your particular position, I urge that you consider alternatives and options that address the needs of other participants.

3. A meeting will be held on Friday, 6 May 1983, in the CCS conference room (6-B-40) at 2:00 PM. Your input is important; I would appreciate it if you would designate a representative should you not be able to attend personally.
